SOFT BEAUTIFUL COOL and WARMY TONES for BRIGHT and FASHIONABLE BLONDES

IT • Delicate nuance formulate per tonalizzare e neutralizzare le mèches senza alterare il colore di fondo dei capelli e per esaltare o ravvivare decolorazioni intensificandone brillantezza e luminosità. Ideali sia per essere utilizzate lo stesso giorno della schiaritura che per mantenere un risultato perfetto tra un servizio e il successivo.

Modo d'uso: Miscelare in rapporto 1:1,5 con Oxicreme a 10 volumi in una bacinella non metallica o in un flacone applicatore e distribuire uniformemente sui capelli lavati e tamponati, dalle radici alle punte.

Tempo di posa: Da 5 a 15 minuti, in base al risultato desiderato; prolungare fino a 20 minuti per un effetto più deciso. Per ottenere un risultato ancora più uniforme, si consiglia di lavorare la miscela su lunghezze e punte durante il tempo di posa. Trascorso il tempo di posa, emulsionare accuratamente con acqua calda. Risciacquare abbondantemente ed effettuare uno shampoo.

EN • Delicate shades formulated to tone and neutralize mèches without altering the basic colour of the hair and to enhance or revive bleached hair by intensifying brilliance and shine. Ideal for use either on the same day as lightening or to maintain a perfect result between one service and the next.

How to use: In a ratio of 1:1.5 mix together with 10 vol Oxicreme in a non-metallic bowl or an applicator bottle and distribute evenly through towel-dried hair from roots to ends.

Processing time: 5 to 15 minutes, depending on the desired result; prolong up to 20 minutes for a more pronounced result. For maximum evenness we suggest working the mixture into the hair lengths and ends during processing time. At the end of processing time, emulsify thoroughly with warm water. Rinse well and shampoo hair.

ES • Delicadas tonalidades formuladas para tonalizar y neutralizar las mechas sin alterar el color de fondo de los cabellos y para exaltar o reavivar decoloraciones, intensificando su brillo y luminosidad. Ideales tanto para ser utilizadas el mismo día de la aclaración como para mantener un resultado perfecto entre servicio y servicio.

Modo de empleo: Mezclar en la proporción 1:1,5 con Oxicreme de 10 volúmenes en un cuenco no metálico o en un frasco aplicador y distribuir uniformemente por los cabellos lavados y escurridos, de la raíz a las puntas.

Tiempo de pose: de 5 a 15 minutos, según el resultado deseado; prolongar hasta 20 minutos para un efecto más intenso. Para obtener un resultado aún más uniforme, es aconsejable trabajar la mezcla en largos y puntas durante el tiempo de pose. Transcurrido el tiempo de pose, emulsionar bien con agua caliente. Adarar con abundante agua y proceder al lavado con champú.

PL • Delikatne odcienie opracowane z przeznaczeniem dla tonowania i neutralizacji pasemek niepowodujące zmian w kolorze bazowym włosów. Mogą być stosowane również dla podkreślenia lub ożywienia wykonanej dekoloryzacji, a jednocześnie nadania włosom połysku i błyszczącego wyglądu. Zalecane do użycia już tego samego dnia przy rozjaśnianiu włosów, w celu zachowania uzyskanego rezultatu, pomiędzy dwoma kolejnymi zabiegami.

Sposób użycia: Wymieszać z preparatem Oxicreme 10 vol. w proporcji 1:1,5, w niemetalowej miseczce lub flakonie z aplikatorem, równomiernie nanieść na umyte i osuszone ręcznikiem włosy, od korzeni aż po końcówki.

Czas działania: od 5 do 15 minut, w zależności od wymaganego rezultatu; przedłużyć czas działania do 20 minut, w celu uzyskania bardziej wyraźnego efektu. Aby uzyskać jeszcze bardziej jednolity efekt zaleca się nałożenie mieszanki na długościach i końcówkach i pozostawienie na czas działania. Po upływie tego czasu dokładnie emulgować z gorącą wodą. Obficie spłukać i umyć włosy szamponem.

CZ • Jemné nuance sestavené pro vytónování a neutralizaci melíru bez zásahu do podkladové barvy vlasů, a pro zvýraznění nebo oživení vlasů, které ztratily barvu, jejich rozzářením a zintenzivněním jasu. Ideální jak pro aplikaci ve stejný den, jako zesvětlení, tak i pro udržování dokonalého vzhledu mezi jednotlivými zásahy.

Způsob použití: Smíchejte v poměru 1:1,5 s Oxicreme v množství 10 objemů v nekovové misce nebo v aplikačním flakonu a rovnoměrně naneste na umyté a ručníkem vysušené vlasy, od kořínků ke konečkům.

Čas působení: od 5 do 15 minut, podle požadovaného výsledku; přejete-li si dosáhnout výraznější efekt, nechte působit až 20 minut. Aby byl výsledek jednotnější, doporučuje se během působení rukama přepracovávat směs po celé délce vlasů i na konečkách. Po uplynutí času působení nanesenou směs důkladně emulgujte teplou vodou. Pořádně opláchněte a vlasy umyjte šamponem.

طريقة الاستعمال: اخلط بمعدل 1:1,5 مع أوكسيكريم عيار 10 أحجام داخل وعاء غير معدني أو داخل قارورة تطبيق، ثم وزع بشكل متجانس على الشعر المغسول والملفوف بشكير للتخلص من الماء الزائد ابتداء من الجذور وحتى الأطراف
مدة الانتظار: من 5 إلى 15 دقيقة بناء على النتيجة المطلوب الحصول عليها؛ انتظر إلى غاية 20 دقيقة إذا أردت الحصول على مفعول أقوى

Every formula reflects the brand's commitment to innovation, safety, and visible transformation, offering smooth, healthy, and radiant hair that lasts for months

HOW TO USE:

STRAND TEST:

Pick a Strand of hair at the back of your head and perform the entire step by step. Observe the processing time to evaluate the smoothing evolution until the desired result does not exceed 60 minutes.
